    - Automatic width

-- default gutter is 30px – 15px on each side of column

-- Create rows inside of containers to correctly space the rows and columns    &lt;div class="container"&gt;

-- Container-fluid will stretch with page    &lt;div class="container-fluid"&gt;

-- Rows created with    &lt;div class="row"&gt;…&lt;/div&gt; or &lt;div class="row-fluid"&gt;…&lt;/div&gt;

-- Cols created with    &lt;div class="col-[devicesize]-[#]"&gt;…&lt;/div&gt;

-- Col spreads need to total 12 for each size to fill rows

-- Row fluid does a better job of nesting inside rows

-- When working with offsets, total to 12 including col size + offset
